# Edgerton Hospital's Rehabilitation Services

# Passionate People, Compassionate Care

Edgerton Hospital's highly trained rehabilitation staff offers a full range of therapies and programs with hometown convenience and care. With decades of experience, our team provides the latest advances in physical, occupational and speech therapy in a state-of-the-art facility. Whether you are recovering from a surgery, accident or illness; our team is available for both inpatient and outpatient care.

At Edgerton Hospital, we work **with you** to help you achieve **your** goals. In doing so, we ensure and maintain open lines of communication with your doctor and other health care providers to optimize your outcomes through multidisciplinary care.

## Physical Therapy

Our Physical Therapists and Physical Therapist Assistants utilize research and clinical experience to help you enhance your quality of life.

Physical therapy can help you:

- **Avoid surgery**
- **Decrease falls**
- Enhance range of motion and strength
- Establish an appropriate home exercise program
- Improve balance
- **Improve gait and mobility**
- Mobilize your joints and soft tissue structures
- Recover from sports-related injuries
- Recover from work or overuse injuries
- Regain function after surgery, illness, injury and/or hospitalization
  - General
  - Neurologic (stroke, Parkinson's, etc.)
  - Orthopedic (total knee replacement, hip arthroscopy, etc.)
- **Relieve pain**

## Occupational Therapy

Our Occupational Therapists are trained to help you adapt to a variety of challenges when dealing with:

- Arthritis
- Job-related injuries
- Neurological deficits following stroke and brain injury
- Orthopedic and soft tissue injuries to the shoulder, elbow, forearm, wrist and hand
- Total joint and general surgeries

Occupational Therapy offers specialized programs that are designed to assist our patients who have:

- Urinary incontinence
- Impaired physical functioning that interferes with their ability to perform daily tasks
- Recommendations for modifications to your physical environment such as equipment to allow for increased safety and independence within your home
- Decreased upper body strength, range of motion and coordination
- Upper body sensory deficits
- Pain and/or swelling in the upper body

## Speech Therapy

Our Speech-Language Pathologist diagnoses, evaluates and treats disorders of speech, voice, swallowing and language. These disorders can include:

- Memory problems
- Speech or language affected by a stroke, head injury, neurological disorder or surgery
- Stuttering or slurred speech
- Swallowing disorders
- Voice problems
