

Be a Founding Member of the Women 4 Women Giving Circle!

First 100 women to raise \$1,000 each will be recognized for their efforts!

3D Digital Mammography System (\$350,000 needed)

What is it?

3D mammography provides images of the breast in “slices” from many different angles, much like a CT scan, finding abnormalities and determining which abnormalities may be important.

Why is it needed?

Studies have shown that women who undergo screening with 3D mammography are less likely to be called back for more testing due to a suspicious finding that turns out not to be cancer.

How can I help?

Please contact your friends and neighbors to raise \$1,000 toward the initial down payment of a \$350,000 equipment piece.

Use pledge sheet or contact Edgerton Hospital Capital Foundation 608-884-1401 for more information.
