Passionate People, Compassionate Care

Edgerton Hospital's highly trained rehabilitation staff offers a full range of therapies and programs with hometown convenience and care. With decades of experience, our therapists provide the latest advances in physical, occupational, and speech therapy in a state-of-the-art facility. Whether you are recovering from a stroke, surgery, accident, or illness, our team is here for your inpatient and outpatient care.

At Edgerton Hospital, we work with you to help you achieve your goals. We communicate with your doctor, and other health care providers, to optimize your outcomes through multidisciplinary care.

Physical Therapy

Through skilled therapy, research, and clinical experience, our Physical Therapists and Physical Therapy Assistants will help you heal and enhance your quality of life.

Physical therapy can help you:

- Decrease falls
- Regain function after stroke, surgery, illness, injury, and/or hospitalization:
 - ➔ General
 - ➔ Neurologic (stroke, Parkinson's, etc.)
 - ➔ Orthopedic (total knee replacement, hip arthroscopy, etc.)
 - ➔ COVID-19
- Recover from work or overuse injuries
- Recover from sports-related injuries
- Relieve pain
- Improve balance
- Avoid surgery

Occupational Therapy

Our Occupational Therapists and Occupational Therapy Assistants are trained to help you adapt to a variety of challenges when experiencing:

- Orthopedic and soft tissue injuries to the shoulder, elbow, forearm, wrist, and hand
- Total joint and general surgery recovery
- Neurological deficits following stroke and brain injury
- Arthritis
- Job-related injuries

Occupational therapy offers specialized programs that are designed to assist our patients who experience:

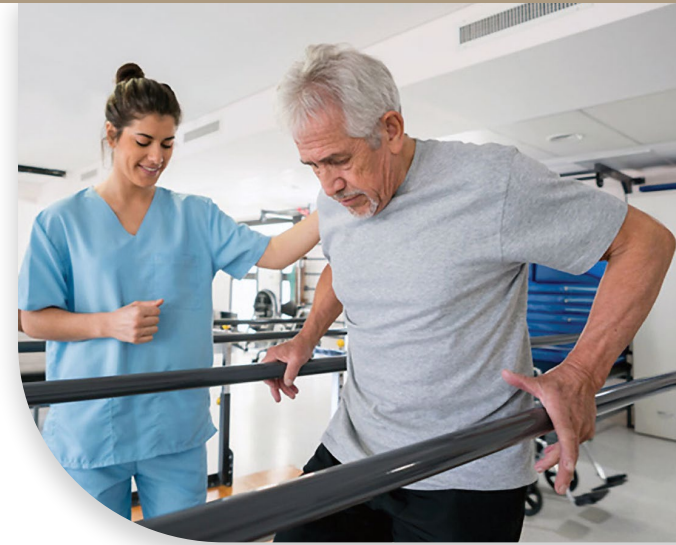

- Decreased upper body strength, range of motion and coordination
- Impaired physical functioning that interferes with the ability to perform daily tasks/work
- Upper body sensory deficits
- Pain and/or swelling in the upper body
- Urinary incontinence

Our therapists may make recommendations for modifications to your physical environment, such as equipment to allow for increased safety and independence within your home/work.

Speech Therapy

Our Speech-Language Pathologists evaluate and treat disorders of speech, voice, swallowing, and language. These disorders can include:

- Speech or language affected by a stroke, head injury, neurological disorder, or surgery
- Swallowing disorders
- Voice problems
- Memory problems
- Slurred speech
- Thinking skills

Same-week and early evening appointments are available. In addition to traditional physical, occupational, and speech therapy, we provide:

- ➔ Post-surgical therapy
- ➔ Neurological disorder treatments
- ➔ Lymphedema management
- ➔ Dry needling therapy
- ➔ Incontinence training
- ➔ Video swallow studies
- ➔ COVID-19 recovery therapy
